

Doulton® Filtered Water Shower Head

Enjoy a better
showering
experience.

Doulton® is the name that you can trust in water filtration.

Your shower filter is designed to remove unwanted chlorine and particles from your shower water. Protecting your hair and skin from harsh chemicals.

Discover the Doulton® difference with our Shower Head Filter and enjoy a better showering experience.

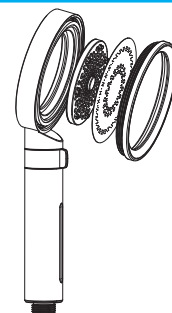

About our dual filter system:

The Doulton® Shower Head Filter significantly reduces chlorine and sediment in your shower water*.

Our filter provides 8000 litres capacity which equates to approximately 2 months for a family of four.**

About our Shower Head:

- Stainless steel face plate that gives a superfine spray.
- Switch feature lets you switch from filtered to un-filtered water to save filter life.
- Contains a dual filter system – reduces chlorine and sediment in your shower water.
- Inspection window in handle to view filter condition, ensuring that you always have the best shower.

Technical Specification:

	Shower Filter Cartridge
Minimum Recommended Flow Rate	2L/min****
Water Supply	Municipal
Pressure	0.5 – 5.5 Bar operating pressure***
Temperature	5-50°C

* Tested In-house

** Depending upon the quality of your tap water.

*** If your water pressure is above 5.5 bar we recommend that a pressure regulator should be fitted before the shower head to reduce the pressure to less than 5.5 bar

****If using this shower head with an electric boiler or shower, please consult your appliance manual for minimum operating water flow.
