

AQUAJET

AQUAPOINT

L'azienda nasce negli anni 70 e si specializza nella lavorazione e trasformazione delle barre in ottone. La sua capacità di interpretare le esigenze di un mercato in evoluzione favorisce la realizzazione di prodotti di alta qualità e di elevate performance tecniche.

Colortap progetta la prima e più vasta gamma di raccordi in metallo ad innesto rapido sia a bassa pressione (per l'utilizzo nel giardino e nella casa), sia ad alta pressione (per l'utilizzo nell'industria e nel settore delle idropultrici). Collezioni uniche e versatili, prodotti competitivi e innovativi nelle soluzioni e nei materiali che ne garantiscono funzionalità e durata nel tempo e certificati da un rigoroso controllo di qualità.

The company was founded in the '70s and specialised in the machining and transformation of brass bars. Its ability to understand the needs of an evolving market favours the realisation of high-quality products with high technical performance.

Colortap designs the first and widest range of quick-connect metal fittings for both low pressure (for use in the garden and home) and high pressure (for use in industry and pressure washers sector). Unique and versatile collections, competitive and innovative products with solutions and materials that guarantee functionality and durability and are certified by rigorous quality control.

LONG LIFE METAL SYSTEM

La nostra realtà è specializzata in sistemi in metallo per agevolare l'irrigazione: prodotti in ottone robusti, affidabili nelle prestazioni, caratterizzati da un ciclo di vita lunghissimo e facilmente recuperabili tramite il riciclaggio.

Qualità, cura nei dettagli, innovazione tecnologica, continua ricerca di soluzioni e materiali, flessibilità e attenzione all'ambiente: questi i capisaldi che ci permettono di dare vita a collezioni uniche e versatili e a prodotti funzionali, duraturi nel tempo e certificati.

Grazie alle competenze consolidate in tanti anni di attività, in Colortap disponiamo di un servizio di engineering che si occupa di progettare e realizzare anche particolari soluzioni su disegno del cliente.

Our company specialises in metal systems to ease irrigation: robust brass products, reliable in performance, characterised by a very long-life cycle and easily recoverable through recycling.

Quality, attention to detail, technological innovation, continuous research into solutions and materials, flexibility and care for the environment: these are the cornerstones that allow us to create unique and versatile collections and functional, long-lasting and certified products.

Thanks to the skills consolidated over many years of activity, at Colortap we have an engineering service that also designs and realises special solutions according to customer drawings.

BACKGROUND

La nostra storia comincia negli anni 70 all'interno di un tessuto produttivo, quello della Val Trompia, caratterizzato dalla capacità di lavorare meticolosamente il metallo. È proprio in questo contesto che ci siamo fatti conoscere, grazie all'intuizione di offrire al mercato un innesto rapido in ottone per il giardinaggio compatibile con i raccordi in plastica. Perseguendo costantemente la scelta del metallo come materiale identificativo della produzione, abbiamo ampliato la gamma di prodotti fino a diventare un importante riferimento per gli alti standard di qualità, la tecnica e il gusto del "made in Italy" che caratterizzano i nostri prodotti.

Our story begins in the 70s within a production fabric, that of Val Trompia area, characterised by the ability to meticulously work metal.

It was in this context that we made a name for ourselves, thanks to the intuition of offering the market a brass quick coupling for gardening compatible with plastic systems.

Constantly pursuing the choice of metal as the identifying material for production, we have expanded our range to become an important reference for high-quality standards, technique and taste of 'made in Italy' that characterise our products.

Ideati, Progettati e Prodotti in Italia
Conceived, Designed and Manufactured in Italy

GREEN PASSION

Verdi sono i giardini irrigati grazie ai nostri sistemi. Verde è il pianeta in cui vogliamo vivere. Verde è il cuore che batte in Colortap. Oltre a progettare tutti i prodotti in modo che consumino a parità di efficacia minori quantitativi di acqua, durante tutto l'iter produttivo prestiamo grande attenzione alle problematiche ambientali:

- dal 2010 attingiamo parte dell'energia elettrica dagli impianti fotovoltaici installati sui nostri siti produttivi;
- rispettiamo meticolosamente tutte le normative legate alla lavorazione dell'ottone, notoriamente molto restrittive;
- siamo dotati di un rigido sistema di controllo che evita ogni dispersione nell'ambiente di oli lubrificanti e di ogni altra sostanza;
- rendiamo tutti gli sfridi di lavorazione alle fonderie perché vengano riutilizzati come materia prima;
- differenziamo e smaltiamo accuratamente i rifiuti non recuperabili;
- progettiamo packaging e imballaggi riducendo al massimo l'utilizzo di plastica e di carta

Green are the gardens irrigated thanks to our systems. Green is the planet we want to live on. Green is the heart that beats in Colortap. In addition to designing all products so that they consume less water for the same effectiveness, we pay great attention to environmental issues throughout the production process:

- since 2010 we have been drawing part of our electricity from photovoltaic systems installed on our production sites;
- we meticulously comply with all regulations related to brass machining, which are notoriously restrictive;
- we have a strict control system that prevents any dispersion of lubricating oils and any other substances into the environment;
- we return all machining waste to the foundries for reuse as raw material;
- we carefully sort and dispose of non-recoverable waste;
- we design packaging and wrapping to minimise the use of plastic and paper

UNIVERSAL

Le nostre radici e i nostri rami portanti. L'intuizione che ci ha permesso, negli anni 70, di affermarci sul mercato, ideando per primi una gamma di raccordi in ottone ad innesto rapido compatibili con i raccordi in plastica. Una scelta, quella dell'utilizzo del metallo, che ci accompagna tuttora e che è il nostro segno identificativo. Per garantire la massima compatibilità con tutti i sistemi in plastica i raccordi sono torniti da barre in ottone con macchine di precisione. L'innesto "Quick system" è completamente automatico grazie alle 6 sfere. I componenti, molle e sfere, sono inossidabili grazie all'impiego dell'acciaio inox. La cartuccia (da noi ideata e brevettata) è autolubrificante per una lunga durata degli O'ring di tenuta. La pressione di esercizio è garantita fino a 10 bar.

Our roots and bearing branches. The intuition that allowed us, in the '70s, to establish ourselves on the market, being the first to design a range of brass quick-connectors compatible with all plastic systems. A choice, that of using metal, which has been leading us to this day and which is still our identifying mark. To ensure maximum compatibility with all plastic versions, our connectors are turned from brass bars using precision machines. The "Quick system" coupling is fully automatic thanks to the 6 balls. The components, springs and balls, are rustproof thanks to the use of stainless steel. The cartridge (designed and patented by us) is self-lubricating to ensure a long service life of the sealing O'rings. The operating pressure is guaranteed up to 10 bar.

GARDEN TAPS

Un materiale, il metallo, che garantisce robustezza, resistenza e durata nel tempo. Una progettazione tecnica che coniuga funzionalità, ergonomia e design. Interamente ideati e sviluppati dal nostro ufficio tecnico, i rubinetti da esterno in ottone rappresentano, insieme ai raccordi, il nostro fiore all'occhiello. Utilizzabili per i più svariati impieghi, dalla semplice presa d'acqua alle prese multiple per l'utilizzo di centraline o elettrovalvole, i nostri Garden Taps sono adatti al contatto con acqua potabile e garantiti ad una pressione di esercizio di 10 bar.

A material, metal, that guarantees strength, resistance and durability. A technical project that combines functionality, ergonomics and design. Entirely conceived and developed by our technical department, the brass outdoor taps are, together with the connectors, our flagship product. Suitable for a wide variety of uses, from the simple water outlet to multiple outlets for the use of control units or solenoid valves, our Garden Taps are fit for contact with drinking water and guaranteed to operate at a pressure of 10 bar.

Nuovi rubinetti a risparmio idrico con cartuccia a disco ceramico e maniglia verniciata (apre/chiude in 1/4 di giro). Grazie al nuovo aeratore "ECO" riducono il consumo d'acqua del 25% senza alterare l'efficacia dell'irrigazione.

New water saving taps with ceramic disc cartridge and lacquered handle (open/close 1/4 turn). Thanks to the new "ECO" aerator, water consumption will be reduced by 25% without affecting the irrigation efficiency.

20°

Attimi di refrigerio all'aperto per persone e amici a quattro zampe. Grazie all'evaporazione delle microgocce prodotte dai nebulizzatori, la temperatura dell'aria circostante si abbassa fino a 10°C rinfrescando l'ambiente. Facile da montare e prolungare, l'impianto di raffreddamento funziona con la normale pressione del rubinetto.

Cool off moments in the outdoor for people and pets. Thanks to the vaportisation of the micro-drops produced by the sprays, the surrounding air temperature decreases by up to 10°C, cooling the affected area. Easy to install and extend, the cooling system works with normal tap pressure.

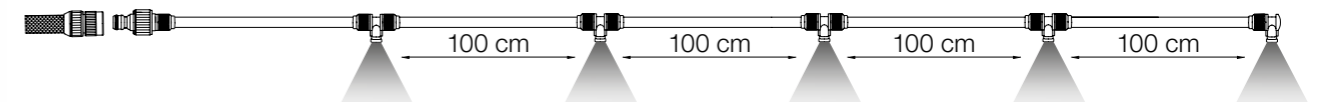

IDEALE PER OMBRELLONI E GAZEBO IDEAL FOR SUNSHADES AND GAZEBOS

CONTIENE:

- N.1 tubo da 7.5 m (fig. 1)
- N.1 raccordo con filtro per connessione alla rete idrica (fig. 2)
- N.5 nebulizzatori (fig. 3)
- N.5 mollette per fissaggio a tende e ombrelloni (fig. 4)
- N.5 ganci per fissaggio a parete e soffitto (fig. 5)

KIT CONTAINS:

- N.1 7.5 m pipe (fig. 1)
- N.1 fitting and filter for connection to the water mains (fig. 2)
- N.5 sprays (fig. 3)
- N.5 clamps for fixing to awnings and sunshades (fig. 4)

SOFT RAIN

Una pioggia morbida per bagnare delicatamente fiori e piante senza danneggiarli. Una gamma di prodotti dedicati prevalentemente all'irrigazione professionale (vivai e serre) ma di grande impiego anche nei giardini e orti per la loro facilità d'uso ed efficacia. Lance estendibili, prolunghe e soffioni per ogni esigenza, tutti realizzati in alluminio per garantire la massima durata nel tempo.

A soft rain to gently water flowers and plants without damage. A range of products mainly intended for professional irrigation (nurseries and greenhouses) but also of great use in gardens and vegetable plots due to their ease of use and efficiency. Extendible lances, extension tubes and shower heads for every need, all made of aluminium to guarantee maximum durability.

PROFESSIONAL

L'ottone (stampato e tornito) è l'elemento che accomuna la vasta gamma di raccordi ad uso professionale, pensati per ogni tipologia e misura di tubo flessibile e per utilizzi più o meno pesanti.

- **MAXIPASS:** raccordi rapidi a grande passaggio d'acqua
- **EXPRESS:** raccordi rapidi a baionetta
- **TRADIZIONALE:** raccordi tradizionali ad avvitamento
- **EXTRA PESANTE:** raccordi tradizionali extrapesanti ad avvitamento
- **ALTA PRESSIONE:** raccordi per irradiazione e per idropulitrici

Brass (moulded and turned) is the element that unites the wide range of fittings for professional use, designed for every type and size of hose and for more or less heavy use.

- **MAXIPASS:** quick-fit connectors with large water flow
- **EXPRESS:** quick connectors
- **TRADIZIONALE:** screw-in connectors
- **EXTRA-HEAVY RANGE:** extra heavy traditional screw-in connectors
- **HIGH-PRESSURE:** HP connectors for spray hoses and high-pressure cleaners

Vent'anni fa la svolta nell'irrigazione interrata: i primi collettori in metallo. Un materiale, l'ottone, che non subisce danneggiamenti e garantisce la massima durata nel tempo dell'impianto interrato. Serie completa di collettori nelle misure 3/4", 1" e 1 1/2" con o senza valvola integrata. Le guarnizioni in dotazione sono in gomma EPDM per assicurare un assemblaggio rapido e sicuro (anche senza chiavi). I nostri Modular Manifolds sono i più apprezzati dagli installatori professionisti per la loro affidabilità.

Twenty years ago the breakthrough in underground irrigation: the first metal manifolds. A material, brass, that is not susceptible to damage and guarantees maximum durability of the underground system. Complete series of manifolds in sizes 3/4", 1" and 1 1/2" with or without built-in valve. The gaskets provided are made of EPDM rubber to ensure quick and safe assembly (even without wrench). Our Modular Manifolds are most appreciated by professional fitters for their reliability.

AQUAPOINT

Una presa d'acqua ovunque sia necessaria, intorno al verde o a parete, per uso professionale e non solo... la magia di Aquapoint. Elementi di grande design, unici e versatili, che garantiscono funzionalità e durata nel tempo. I prodotti Aquapoint sono realizzati con estrusi di alluminio lavorati e verniciati a polveri poliestere per outdoor. A completare ed arricchire la gamma svariate versioni e declinazioni del prodotto: dalle fontane e punti d'acqua, alle colonnine per presa elettrica e docce da esterni.

A water outlet wherever it is needed, around greenery or on the wall, for professional use and beyond... the magic of Aquapoint. Great design elements, unique and versatile, guaranteeing functionality and durability. Aquapoint products are made of machined aluminium extrusions and painted with polyester powder for outdoor use. A variety of product versions and declinations complete and enrich the range: from fountains and water points to electric socket columns and outdoor showers.

MOON

Colonnina idrica tonda da giardino con LED notturno a ricarica solare. In alluminio verniciato a polveri poliestere antigraffio, completa di rubinetto cromato e verniciato con aeratore "ECO", e sella porta-tubo in acciaio inox.

Rounded garden water outlet post with solar-powered night LED. In aluminium lacquered with polyester anti-scratch paint, complete with chromed and lacquered tap with "ECO" aerator and stainless steel hose-hanger.
